SAFETY & QUALITY POLICY

SAFETY & QUALITY POLICY

It is the declared policy of the ADUBA SAFETY SYSTEMS AND FIRE PROTECTION to provide a high quality service that consistently satisfies the expectations and requirements of our customers. To this end, we are committed to a philosophy based on customer focus and continual improvement and we will provide the leadership and example required to carry this process throughout the organization as we grow. We will ensure that all our staff, are given the necessary resources and training to ensure that these ambitions are met. We will ensure that the effectiveness of the Quality Management System is measured on a regular basis through the process of internal audits, analysis of non-conformities, customer and employee satisfaction and management review. The outcome of these actions will form the basis of plans for the ongoing improvement of the system and subsequent improved service to our customers.

The Quality management system detailed in the manual meets the requirements of BS EN ISO 9001:2015 and describes the organization and procedures necessary to achieve these objectives. This has enabled us to achieve the following certifications for Abu Dhabi office.

ENVIRONMENT POLICY STATEMENT

ADUBA SAFETY SYSTEMS AND FIRE PROTECTION conducts its business in an environmentally responsible manner. As a leader in the Fire Fighting & Fire Alarm technology to measure and drive energy conservation and reduce its carbon footprint. We consider compliance with legislation to be a baseline standard and we strive to continually improve our environmental performance. These aims will be achieved through:

Incorporating environmental responsibility into all business operations by planning environmental protection, reviewing and developing policy, by setting targets and reviewing and auditing performance.

Implementing a systematic waste minimization program to achieve objectives and targets to reduce waste, avoiding the use of terminal waste treatment and dealing with it as far as possible at source.

Pursuing continuous improvement in environmental performance, where reasonably practicable, by setting objectives and targets, especially in addressing the areas of resource use, by reducing energy and water consumption, increasing reuse and recycling and improving solid and liquid waste management methods

Being committed to maintaining effective communication systems on environmental matters through training and improved awareness. Engaging with our customers and other partners to understand how our products and services can help meet their sustainability goals; and investing in products and services that have sustainability benefits..

Purchasing environmentally preferable products and favoring products with reputable certifications or labels.

This policy will be reviewed periodically and amended as necessary to ensure that it remains relevant to the activities of the company and complies with current legislation and best practice. This has enabled us to achieve the following certifications for Abu Dhabi office.

ENGINEER'S REMARKS :

**No Objection Subject To Incorporation
Of All Comments As Noted In Attached
Comments Sheet.**

Corrections or comments made relative to submittals during this review does not relieve the contractor from compliance with the requirements of his Contract, drawings and specifications. This review is only in respect of general conformance with the design intent of the project and general compliance with the information given in the Contract documents. The contractor remains responsible, among other things, for the design of the project or such parts of the project he has design responsibility for (if design forms part of the Contract), for confirming and correlating all quantities and dimensions, selecting fabrication processes and techniques of construction, coordinating his work with that of other trades, and performing his work in a safe and satisfactory manner, all in accordance with the Contract.
